BIRTHDATE

NAME

CPI No.

SEX: M F VISIT No. _____

**Pre-Admission Type & Screen (PTS) Identification
(PINK FORM)**

Some patients may have a pretransfusion type/screen collected up to one month prior to surgery. A PTS number is attached to an addressographed PTS Information form at the time of pretransfusion specimen collection. When the patient arrives, request the PTS Information form and verify the following:

1. PTS Information form contains patient information Yes No

2. Verify that the CPI number, patient name and birthdate on the patient's identification wrist band match the information on this sheet and on the patient's addressograph plate.

3. PTS number is present and intact on the blue form Yes No

4. PTS # on the blue PTS form is _____

5. Date specimen Collected _____

6. Completed by: _____ Date: _____

7. Patient going to: (*Circle or Indicate "Other" Location*)

Main OR Mott OR CVC OR Other _____

A "NO" response requires a new specimen collection for Type and Screen. Send this pink sheet, new specimen and Blood Bank requisition to the Blood Bank immediately.

**IMMEDIATELY SEND FORM TO BLOOD BANK
