Our goal is to provide a state-of-the-art course in Anatomic Pathology with an emphasis on interactions between our faculty and attendees.

The Department of Pathology at the University of Michigan Health System offers this 2.5 day conference to meet the educational needs of practicing Pathologists, residents and fellows. Participants may earn CME or SAMS credits through case-based content and breakout sessions.

The New Frontiers Conference objectives are:
- A better understanding of new diagnostic methods
- Current tools and medical information technology
- Improve interpretation of difficult cases
- Impact of discoveries in molecular medicine
- Practical knowledge via case-based presentations

The impact of discoveries in GI and pancreatic cancer, thyroid cancer, genomic characterization/advanced diagnostics and laboratory solutions for population health will be highlighted in the keynote and plenary lectures. Diagnostic problems in Anatomic Pathology will be emphasized, with a focus on using current tools. Case-based presentations and breakout sessions with audience participation will address complex diagnostic challenges. At the end of this course, participants will have a better understanding of new methods and ideas in diagnostic pathology, using current tools and techniques, and will be presented with ideas for implementation of new methods in their practice.
