BLADDER Neoplasm: Transurethral Resection (TURBT)
(Classify based on highest Grade/Stage lesion)

Specimen Part #’s involved:

Tumor type:

- Papillary Urothelial carcinoma
  - circle one: invasive noninvasive indeterminate
- Invasive (Non-Papillary) Urothelial carcinoma
- Carcinoma in situ (CIS)

Non-Urothelial differentiation:

Present
  - If present: Type___________ Amount__________%

Absent

Modified ISUP/WHO Grade:

- Low Malignant potential
- Low grade
- High grade

Stromal (Lamina propria) invasion:

- No stroma present
- Stroma present; no evidence of invasion
- Stroma present, suspicious or indeterminate for invasion
- Stroma present with evidence of invasion

For stromal invasion only:

- Muscularis mucosa invaded: Yes No Indeterminate

Muscularis propria invasion:

- No muscularis present
- Muscularis present; no evidence of invasion
- Muscularis present, suspicious or indeterminate for invasion
- Muscularis present with evidence of invasion

Angiolympathic invasion: Present Absent

PDS template: TURB
Accession # ___________________________ Name ___________________________

CIS adjacent to tumor:  Present  Absent
