

## Cutaneous Squamous Cell Carcinoma – Sentinel Lymph Node Profile

Anatomic Site:

Sentinel Lymph Node #:

Count:

Blue Dye:      Yes                      No

Diagnosis:      positive              negative              equivocal

H&E:              positive              negative              equivocal

MNF116:        positive              negative              equivocal

Tumor Burden/size of largest metastatic focus: % of lymph node involved/ \_\_mm or N/A

Histologic grade: (Well differentiated/moderately differentiated/poorly differentiated) or N/A

Location of metastatic tumor: (Subcapsular sinus; intracapsular lymphatic; trabecular sinus; parenchyma) or N/A

Extranodal extension: (Present/absent) or N/A; If present: (Focal/extensive)
