Pleural Mesothelioma: Resections ONLY

Specimen, including laterality:
  - RIGHT or LEFT Pleura
  - Other (specify)

Procedure:
  - Decortication
  - Extrapleural pneumonectomy
  - Other (specify)

Specimen integrity:
  - Intact
  - Fragmented

Sites involved by tumor/Tumor extent (select all that apply):
  - Parietal pleura
  - Visceral pleura
  - Lung parenchyma
  - Pericardium
  - Ribs
  - Other (specify)

Tumor focality
  - Diffuse
  - Localized (sharply circumscribed)

Histologic type
  - Epithelioid mesothelioma
  - Sarcomatoid mesothelioma
  - Desmoplastic mesothelioma
  - Biphasic mesothelioma
  - Other (specify)

Margins
  - Not applicable
  - Cannot be assessed
  - Negative
  - Involved by mesothelioma (specify)

Treatment effect
  - Not applicable
  - More than 50% residual viable tumor
  - Less than 50% residual viable tumor

Pathologic stage (TNM; AJCC 7th ed)
