ACIS - TS Receptor Template

Soft Code: TSR (revised 9/26/14)

Provided immunohistochemical stains show the invasive carcinoma cells to be

estrogen receptor: (_%) NEGATIVE FOCAL/WEAK POSITIVE

progesterone receptor: (_%) NEGATIVE FOCAL/WEAK POSITIVE

HER-2/neu: (0), (1+), (2+), (3+)

NEGATIVE EQUIVOCAL POSITIVE

for overexpression. Controls are appropriate.

Per report, HER-2/neu FISH analysis was

NEGATIVE EQUIVOCAL POSITIVE

for HER-2 gene amplification (HER-2/CEP-17 ratio=___; average HER-2 signals/cell=___).
