

Objectives

Education credit is being provided through the Michigan Association of Blood Banks who is approved as a provider of continuing education in the clinical laboratory sciences by the ASCLS P.A.C.E.® Program.

Objectives: At the end of the session the participant will be able to:

1. Apply antibody identification techniques to routine problems.
2. Apply problem solving strategies to clinical case studies.
3. Describe the evolution of the technologists role during the past 75 years of blood banking.
4. Describe the role of the anesthesiologist in intraoperative transfusion therapy.
5. Discuss the routine use of A plasma in patient resuscitation in the ED.
6. Describe the current treatments for primary immunodeficiencies.
7. Describe the goals of the AABB's Patient Blood Management Standards and the Hemovigilance Programs.
8. Describe the special blood needs of three patient groups.
