

Postdoctoral Fellowship Available

Thomas Wilson and Thomas Glover

University of Michigan, Ann Arbor, MI

**Transcription-replication conflicts,
fragile sites, cancer genomics**

Available immediately (fall 2016)

The Tom Wilson and Tom Glover laboratories are recruiting for a new fully funded postdoctoral position to study copy number variant (CNV) formation in the human germline and cancer, with strong emphases on genomics, transcription, and replication biology. Best candidates will have extensive experience with mammalian cell culture and genomic technologies, and a strong interest in exploring the molecular mechanisms by which conflicts between replication and transcription lead to genomic structural alterations in health and disease.
